

BIVC Membership 1962 to 2015

In the 1960's the membership was divided into 3 grades:
 A - graduates (45% of members);
 B - professional qualifications (40%)
 C - others (10%)

Until 1970 there was not a fixed membership year: it ran from the anniversary of joining. Figures not comparable

In the late '60's the sex ratio became unbalanced. It was kept to 3 women : 2 men by having a waiting list of women wanting to join and being stricter with the selection criteria.

The point in the membership year that the figures were recorded varies - so the figures are not directly comparable.

The gaps are where the membership secretary didn't make the figures available.
